ODINAKA JOY

Software Engineer

dinakajoy@gmail.com | dinakajoy.dev | github.com/dinakajoy | linkedin.com/in/dinakajoy

SUMMARY

- +4 years building web platforms with **TypeScript,** React.js, Next.js, Node.js, **Express.js and OCaml**
- Hands-on experience on **AI-powered applications** integrating **LLMs and models**.
- Built a **SaaS B2B application** with 300+ active organizations and 20,000+ users.
- Managed and built an **ERP** for a haulage company with 1,000+ users.
- Managed and built a **Learning Management system** for a tech training company with payment integration.
- Ported a unix-based git-like database to work on web platforms using JavaScript and Web Socket.

SKILLS

- **Languages:** JavaScript (Node.js, TypeScript), Python (AI/ML), OCaml
- **Frameworks/Tools:** Express.js, React.js, Next.js, LangChain
- **Databases:** PostgreSQL, MongoDB, Irmin (OCaml Git-like DB)
- **AI/ML:** LLMs (RAG, fine-tuning, Agents), Pandas, Matplotlib, NumPy, Scikit-learn
- **Others:** Git, GraphQL, REST APIs, Docker, TailwindCSS, AWS, GCP

EXPERIENCE

Software Engineer — AcceleratorApp
Feb 2022 - Oct 2024

- Built and maintained an incubation platform serving 300+ startups and 20,000+ users using React.js and Node.js.
- Designed backend features with Node.js and Express.js, focusing on performance and reliability.
- Improved integrations for startup application reviews, reporting, and user management.
- Integrated third-party tools like Zapier to automate complex workflows for clients, reducing manual effort and increasing customer satisfaction

OCaml Developer — Tarides
Jan 2022 - Jul 2022

- Ported **Irmin**, a Git-like OCaml database to be integrated also into web projects.
- Collaborated with senior engineers to maintain open-source standards and code quality.

OCaml Developer - Outreachy
May 2021 - Aug 2021

- Worked on a **GraphQL API to access opam packages**, improving developer tooling in the OCaml ecosystem.

Team Lead & Backend Developer — Loctech IT Solutions
Aug 2020 - Dec 2020

- Led a team of four to build an ERP system automating years of manual processing using React.js and Node.js.
- Worked on contract to build an online learning management system *(Contract Role: Sep - Dec 2021)*

PROJECTS (Selected)

- ***DocuQuery*** – Q&A on documents using LLMs. Lets users upload files and query them directly. ***(Next.js, LangChain, OpenAI API)***
- ***Job Application Assistant*** – SaaS concept helping users streamline applications with AI support. ***(Next.js, Node.js, OpenAI APIs)***
- ***AuthXpress*** – Authentication and authorization service for modern web apps. *(React.js, Node.js, Express, MongoDB)*
